

3190 Manual Addendum

This addendum describes the functionality of the 3190 Digital TV Receiver. The 3190 Nextwave Australian Digital TV Receiver has the added benefit of component out via Scart. This functionality provided high quality video signals to your Television display.

This addendum makes alterations to the Video/Audio Settings of the system menu and provides an additional installation diagram for connecting to a TV via component out.

Video / Audio Setting

Audio Output

You can select Stereo, Left, Right or Mixed Output mode by using the ◀ ▶ buttons.

Please Note: Use Audio button on remote as a hotkey.

Screen Ratio

You can select TV screen format by using the ◀ ▶ buttons. The 4:3 format is the standard format, the 16:9 for a wide screen TV.

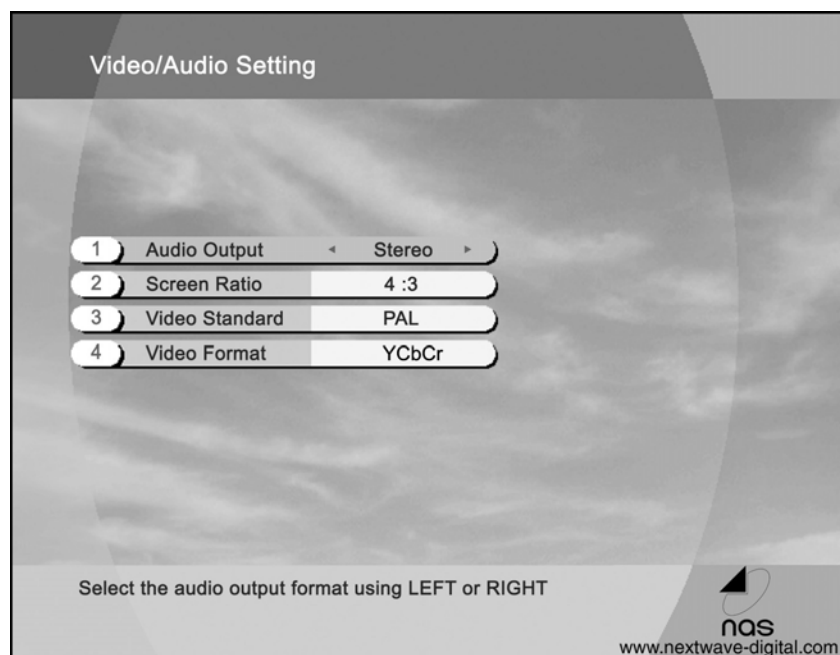

Please Note: Use wide button on remote as a hotkey.

Video Standard

You can select video standard (PAL/NTSC/AUTO) by using the ◀ ▶ buttons.

Video Format

You can select video format (RGB/CVBS/YCbCr) by using the ◀ ▶ buttons.

3190 Manual Addendum

Connecting to a TV using Component (Y,Cb,Cr) output

1. Connect the coaxial cable from the Antenna to the ANT IN socket on the rear panel of the STB.
2. Connect a SCART to Component (Purchased separately) cable to the SCART TV socket on the STB and the Component IN (Y,Cb,Cr) socket on your TV.
3. Component output needs to be activated via the Video Configuration menu. See page 21 for details.
4. Depending on your audio needs, link audio output from any one of the three types of audio connections.
